## Carbon Reduction Challenge

Team PMV
Jacob Castle, Andrew Knight, Matthew Zukowski, Fathi Ahmed, Sarina Raniit, Simba Mushayamunda

## Project Overview

## Primary Objectives and Recommendations:

- Provide free parking at the Truist Parking Center to employees who carpool
- Coordinate between departments to set basic procedures, advertise the incentive, and track program uptake

## Net Carbon Reduction and Cost Savings:

- Reduce carbon emissions relative to the reduction in cars commuting
- Cost savings pro-rated to the market value of the offset carbon
- Project has long-term positive follow-on effects and a high potential for additional carbon/cost savings

## Background, Motivation, and Purpose

- Increasing Sustainability
- Offsetting Truist's Carbon Footprint
- Living our Purpose, Mission, and

Values

- Brining Teammates Together
- Radical Ownership

## Carbon Reduction and Cost Savings

- Estimated 85,500,000 grams (188,495 lbs.) of annual carbon reductions
- Carbon savings valued at a minimum of over $\$ 8,750 / \mathrm{yr}$.
- Project contains ample room for expansion and additional carbon/cost savings at scale

| Total Estimated Carbon Reduction (in grams) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| *Assumes an average of 19 miles round trip commuted daily at a rate of 400 grams of carbon per mile for 50 weeks per year |  |  |  |  |  |  |
|  |  | 50 | 100 | 150 | 200 | 250 |
| Average | 1 | 19,000,000 | 38,000,000 | 57,000,000 | 76,000,000 | 95,000,000 |
|  | 2 | 38,000,000 | 76,000,000 | 114,000,000 | 152,000,000 | 190,000,000 |
| Days | 3 | 57,000,000 | 114,000,000 | 171,000,000 | 228,000,000 | 285,000,000 |
|  | 4 | 76,000,000 | 152,000,000 | 228,000,000 | 304,000,000 | 380,000,000 |
| Carpooled | 5 | 95,000,000 | 190,000,000 | 285,000,000 | 380,000,000 | 475,000,000 |

| Total Estimated Carbon Savings Market Value <br> *Assumes an average of 19 miles round trip commuted daily at a rate of 400 grams of carbon per mile for 50 weeks per year ${ }^{*}$ Carbon valued at $\$ 93 /$ ton |  |  |  |  |  |  |  |  |  |  |  |

## Co-Benefits

## Safety, Longevity, Community

- Fewer cars on the road will reduce the potential for traffic collisions
- Carpooling allows time for conversation, team bonding, and collaboration
- Fewer cars on the road reduces the volume of traffic congestion in metropolitan areas
- Rotating cars distributes wear and tear more evenly, reducing maintenance costs and extending vehicle life
- The reduction in car garage use reduces overcrowding and allows teammates to find more convent parking spaces

## Next Steps

- Expansion into other Truist offices around the nation (specifically Atlanta locations)
- Create additional individual incentives to increase participation
- Will be presented at the Truist ESG
 summit for possible implementation
