

Websites & Research Organizations

Climate data, sustainability strategy, carbon accounting, and local resources

Climate Science & Data

[SCIENCE] IPCC — Intergovernmental Panel on Climate Change

<https://www.ipcc.ch/>

The authoritative global source for climate science. Find current data and impacts, future projections, and mitigation strategies across all sectors. The Sixth Assessment Report (AR6) is the current cycle, with AR7 underway.

[SCIENCE] NASA Climate

<https://climate.nasa.gov/solutions/adaptation-mitigation/>

Explore current climate data, sustainability concepts, and NASA-backed adaptation and mitigation solutions.

Sustainability Strategy & Business

[BUSINESS] Project Drawdown

<https://drawdown.org/>

One of the best resources for actionable climate solutions. Advances science-based strategies for reducing and removing emissions, with detailed analysis by sector — perfect for scoping your project.

[BUSINESS] Trellis Group (formerly GreenBiz)

<https://trellis.net/>

Articles, podcasts, webinars, and research on corporate sustainability and the clean economy.

■ *GreenBiz rebranded as Trellis Group in 2024. Update any saved links from greenbiz.com → trellis.net.*

[BUSINESS] World Resources Institute (WRI)

<https://www.wri.org/>

A leading research organization with extensive resources on climate change, sustainability, and practical business and policy solutions.

[BUSINESS] Carbon Trust

<https://www.carbontrust.com/>

Tools, guides, and case studies to help organizations measure, reduce, and report carbon emissions and transition to a low-carbon economy.

[BUSINESS] Environmental Defense Fund (EDF)

<https://www.edf.org/>

Insights, reports, and resources on climate change, clean energy, and sustainable business practices.

[BUSINESS] Sustainable Brands

<https://sustainablebrands.com/>

News, insights, and resources on sustainability, including case studies and best practices for brands and businesses.

Carbon Accounting & Standards

[STANDARDS] GHG Protocol

<https://ghgprotocol.org/>

The global standard for measuring and managing greenhouse gas emissions. Essential for understanding how carbon footprints are calculated — the methodology behind most corporate and project-level accounting.

Georgia & Local Resources

[LOCAL] Drawdown Georgia

<https://www.drawdownga.org/>

Georgia-specific version of Project Drawdown — identifies the highest-impact climate solutions for the state. Especially relevant for Atlanta-area projects.

[LOCAL] City of Atlanta — Office of Sustainability

<https://www.atlantaga.gov/government/departments/city-planning/office-of-sustainability>

Atlanta's local sustainability programs, climate resilience efforts, and city-level carbon reduction goals.

Transportation

[TRANSPORT] Alternative Fuel Data Center

<https://afdc.energy.gov/>

From the U.S. Department of Energy — data, tools, and resources on alternative fuels and transportation, useful for fleet or commuting-related projects.
